EXPERIENCE

Lead Engineer — Rapid Innovation LLP (Remote)

APRIL 2023 – PRESENT

- Architected **large-scale React applications** and frontend systems, reducing architecture inconsistencies by **40%** and improving long-term maintainability.
- Led frontend engineering across **design reviews, code reviews**, architecture decisions, and developer mentoring, reducing UI bugs by **45%** and improving PR merge time by **30%.**
- Implemented a **Figma MCP–based design-to-code pipeline**, enabling pixel-perfect UI and reducing design rework by **35%**.
- Drove **cross-functional collaboration** with design, backend, and product teams, speeding up feature delivery by **25%**.
- Introduced **structured workflows**, reusable component patterns, and standardization practices, cutting repetitive engineering tasks by **40%**.
- Integrated **AI tools** (Cursor, Copilot, ChatGPT) into the development lifecycle, saving **~30–35 engineering hours** per sprint, reducing test-writing time by **90%** and PR review time by **80%**.

Software Engineer — Rapid Innovation LLP (Remote)

Jun 2021 – Apr 2023

- Delivered highly interactive frontend features by collaborating with **UI/UX teams**, improving design consistency and user experience.
- Built **blockchain-enabled DApps** and **NFT platforms** by integrating **smart contracts, REST APIs,** and **GraphQL**, enhancing data reliability and app performance.
- Developed scalable, responsive, reusable components with an Agile mindset, improving developer velocity and reducing rework.

Frontend Developer — Alnitek Innovative Solutions (Remote)

APRIL 2021 - MAY 2021

- Engineered a **no-code chatbot builder platform** using **React** and **Material UI**, allowing businesses to build and deploy chatbots without technical expertise.
- Implemented **drag-and-drop workflows** to simplify bot creation, reducing setup time for users.

SKILLS

Frontend development:
React JS, Next.JS, Typescript, Redux, Redux toolkit, React Testing Library, React-query, Styled-component, TypeScript, HTML, CSS, Apollo GraphQL

Backend Development:
Node JS, Express JS,

Miscellaneous:
Figma, Jira, Netlify, Render, Firebase, Supabase, SonarQube,

AI Tools Used:
ChatGPT, Cursor AI, Qodo (formerly Codium), Tabnine, GitHub Copilot, Roo Code

LANGUAGES

Marathi: Native

Hindi: Bilingual proficiency

English: Professional working proficiency

- Delivered **end-to-end chatbot lifecycle** features, including build, test, deploy, and performance analytics.

Web Developer — Bitmap Technology, Pune, M.H.
(Internship)

JUNE 20191 - MAY 2020

- Build websites using ReactJS, HTML, and CSS

EDUCATION

Sinhgad Academy of Engineering, Pune, M.H.

Bachelor of Engineering (Computer Engineering)

AUGUST 2017 – MAY 2020 | **Grade: 8.3/10 CGPA**

Shri Sai Polytechnic, Chandrapur, M.H.

Diploma In Engineering (Computer Engineering)

JULY 2015 - MAY 2017 | **Grade: 80.88%**
